PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in MongoDB, Express.js, React.js, and Node.js (MERN stack). Skilled in building responsive web applications, developing RESTful APIs, implementing secure authentication systems, and performing CRUD operations. Proficient in JavaScript (ES6+), API integration, and data structures. Strong problem-solving abilities with a consistent focus on building scalable, efficient, and maintainable applications. Passionate about continuous learning and contributing to impactful, real-world software projects.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, C++

Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Authentication & Authorization (JWT, bcrypt)

Databases: MySQL, MongoDB (Mongoose ODM)

Tools & Version Control: Git, GitHub, Docker, Visual Studio Code (VS Code), Postman

EDUCATION

B.Tech in Electronics & Communication Engineering (ECE) | 2022 – 2026

Greater Noida Institute of Technology, Greater Noida | Dr. A.P.J. Abdul Kalam Technical University (AKTU)

CERTIFICATIONS

- Full Stack Development Certification – Infosys Springboard | July 2025
- Data Structures & Algorithms (DSA) – E&ICT Academy, IIT Kanpur | August 2025
- ReactJS Certification – Infosys Digital Academy, Springboard | March 2026

PROJECTS

Threat Guard – Cybersecurity Threat Detection System | MERN Stack

- Developed an AI-powered cybersecurity platform featuring URL scanning, threat analysis, chatbot assistance, and contact management functionalities.
- Integrated Grok AI API and built secure RESTful APIs with authentication, middleware, and responsive user experience.

Control Desk – Task Management Application | MERN Stack

- Built a complete web-based task management application using the MERN stack with a defined task lifecycle: New → Active → Completed → Failed.
- Implemented full CRUD operations with dynamic state management to handle task creation, updates, and deletion in real time.
- Designed an intuitive dashboard UI allowing users to monitor task progress and filter tasks by status.

Employee Task Manager | React.js

- Created a web-based Employee Task Manager for assigning, monitoring, and tracking employee tasks, with task data persisted in Local Storage for real-time, session-independent updates.
- Implemented task workflow logic with role-based views for Admin and Employee, efficiently handling multi-stage status transitions.

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms (DSA) problems in Java across topics including Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Recursion, and Sorting algorithms.
- Consistently optimized solutions by applying efficient algorithms, improving time complexity and space complexity for competitive-level problem sets.
- Earned certifications from IIT Kanpur (E&ICT Academy) and Infosys, demonstrating commitment to continuous skill development.

LEADERSHIP & ACTIVITIES

- Organized and managed college-level cricket tournaments for 16+ teams, overseeing full-scale logistics, team coordination, and end-to-end match scheduling.
- Demonstrated strong leadership, communication, and event management skills while coordinating across multiple teams and stakeholders.
